9. Key Observations

Transit passes = 31% of items, <4% claimed.

Generic transport passes, youth passes (T-12/T-16), and senior passes (T-Rosa) together = 8,867 items. Low personal value to finders, low effort to replace — explains the near-zero claim rate.

Security-sourced items drive the overall claim rate.

43.7% claim/return rate vs 3.5% for Metro and 15.7% for Bus. Security items are likely proactively matched to owners rather than passively waiting.

Wallets dominate high-value recoveries.

4,798 found; 2,054 claimed (42.8%), 1,474 contained cash. Highest absolute return count of any category by far.

Cases/covers have the highest claim rate at 58.2%.

Likely phone cases — high attachment, easy to identify. Only 4.4pp gap between claimed (58.2%) and returned (53.8%), indicating efficient processing.

August trough: 950 items — 59% below March peak.

Reduced summer ridership explains the drop. Claim rates hold steady (~20%), showing the proportion of people who return to collect is consistent year-round.

Mid-week (Tue–Wed) = 43% of weekly volume.

Saturdays and Sundays combined are just 13% — weekend ridership patterns directly reflected in lost item counts.

1,230 items returned without a logged claim.

Possible proactive staff returns, items returned via ID verification, or missing claim-log entries before the return was processed.

4,762 records (16.6%) have no arrival date.

Significant data gap — likely includes Security-sourced items logged without timestamps. Monthly figures represent only 23,886 of 28,648 records.
